

JONATHAN GAMMILL

Ocean Springs, Mississippi · jonathan.gammill9@gmail.com

PROFILE

Information Technology professional and Digital Forensics graduate with hands-on experience in automation, application development, and secure data infrastructure. Adept at building system integrations, hardening data pipelines, and delivering reliable software across on-premise and cloud environments, with a focus on strategic problem-solving and operational excellence.

EDUCATION

University of South Alabama

Mobile, AL

B.S. in Information Technology, Digital Forensics Concentration

May 2026

- Dean's List: Spring 2025 – Spring 2026
- Member, The National Society of Leadership and Success (NSLS)
- Relevant Coursework: IS Strategy & Policy, Advanced Application Development, Human-Computer Interface, Needs Assessment & Technology Evaluation, Advanced Operating Systems, File Systems for Digital Forensics, Digital Forensic Analysis, Fundamentals of Deep Thinking AI

PROFESSIONAL EXPERIENCE

Asurepoint LLC

Plano, TX

IT Automation Specialist

June 2026 – Present

- Write and maintain automation scripts in Python, Bash, and PowerShell to eliminate manual system administration tasks
- Design automated ETL processes to extract, transform, and move data between disparate systems
- Integrate software platforms via API keys and tokens, and configure webhooks for real-time cross-system actions
- Build secure digital pipelines enabling legacy on-premise systems to communicate seamlessly with modern cloud applications

Application Developer

June 2026 – Present

- Design, develop, and maintain software applications in C#, Java, and Python to meet business and user requirements
- Write clean, well-documented code and debug, test, and troubleshoot applications for performance and reliability
- Collaborate with team members and stakeholders to gather requirements and translate them into technical solutions
- Enhance existing applications by integrating new features and resolving software defects

Mississippi Department of Marine Resources (MDMR)

Biloxi, MS

IT Data Management Intern

Summer 2024

- Gathered statistical data and organized legal records from archived case files
- Produced geospatial maps from satellite imagery and state site data using ArcGIS software

H&H Plumbing

Ocean Springs, MS

Plumbing Apprentice

2019 – 2022

- Installed piping systems (PVC, copper, PEX, cast iron) and fixtures including toilets, sinks, faucets, and water heaters
- Secured and prepared pipes for cutting, threading, and soldering, and applied sealants, tape, and fittings
- Tested systems for leaks and proper pressure to ensure code compliance and reliability

PROJECTS

CIS Senior Capstone — Multi-Agent AI System

January 2026

- Partnered with Fivos Health to build a multi-agent AI system for automated medical device data harvesting and regulatory data validation, following a modular "Collect and Compare" workflow that learns from human review

ITE Senior Demo — IoT Data Carving Tool

Academic Project

- Developed an intuitive Python data-carving application with a custom GUI to access IoT devices (e.g., Ring doorbell cameras, smart home hubs) and parse their video, data, and configuration files

Asurepoint Insurance Group — Portal & Data Resilience

June 2026

- Consolidated a fragmented toolset (Google Sheets, Apps Script, GoHighLevel, EnrollHere) into a unified, HIPAA-compliant web portal with role-based access for agents and CSRs, migrating hosting to Render
- Hardened the data layer with encrypted PostgreSQL backups on AWS S3 using bucket versioning and Object Lock immutability, restored a failed nightly backup job, and planned secure credential rotation to prevent dual-write divergence

Intermediate & Advanced Application Development

Nov 2023 – 2026

- Built applications in C# and Java and used Bash scripting in Linux environments with digital forensics tools to inspect hidden files and decrypt disk partitions on virtual machines

TECHNICAL SKILLS

Languages & Scripting: Python, JavaScript, C#, Java, Bash, PowerShell, Command Line

Digital Forensics: FTK Imager, Autopsy, EnCase, Wireshark, Hex Editor, Data/File Carving, Kali Linux

Cloud & Data: AWS, Google Cloud, PostgreSQL, MongoDB, Data Migration, HIPAA Compliance, Machine Learning, Prompt Engineering

Systems & Tools: Linux, Windows/NTFS, macOS, VM Environments, GitHub, ArcGIS
